Means-Plus-Function Language

The instant claims contain the following means-plus-function language:

1. “means for transferring molten metal” (claim 1), which is defined in the specification at pages 8 and 9 for example, as gas lift pumps and siphon devices.

2. “means for controllably supplying heat to, and removing heat from metal in the furnaces” (claim 1), which is defined in the specification as described in the paragraph bridging pages 9 and 10 of the specification for example.

Claim Objections

Claims 5-8 are objected to under 37 CFR 1.75(c) as being in improper form because a multiple dependent claim cannot depend from any other multiple dependent claim. See MPEP § 608.01(n). Accordingly, the claims have not been further treated on the merits.

Claim 4 is objected to under 37 CFR 1.75(c), as being of improper dependent form for failing to further limit the subject matter of a previous claim. Applicant is required to cancel the claim(s), or amend the claim(s) to place the claim(s) in proper dependent form, or rewrite the claim(s) in independent form. The above claim does not fairly further limit independent claim 1 because the means-plus-function language of instant claim 1, as explained above, already requires that the means for controllably heating include electrical heating means.

Allowable Subject Matter

Claims 1-3 are allowed at least because none of the cited prior art shows or fairly suggests the multiple furnace pair plant where the furnaces must include interior walls of solid iron or steel (the apparatus must be operable to manufacture steel so the furnace walls must be of this composition) with electrical heating means and boiler tube heat removal means as described by independent claim 1, where such an arrangement provides for both efficient steelmaking as well as effective use of the excess heat generated as described at pages 2-6 of the specification, for example.

Conclusion

The prior art made of record and not relied upon is considered pertinent to applicant's disclosure. Each of Warner, Frank, Hunt and Hunt et al are also cited as further examples of prior art process plants.

This application is in condition for allowance except for the following formal matters:

The claim objections recited above.

Prosecution on the merits is closed in accordance with the practice under *Ex parte Quayle*, 1935 C.D. 11, 453 O.G. 213.

A shortened statutory period for reply to this action is set to expire **TWO MONTHS** from the mailing date of this letter.
